

## Frank Hirschvogel Foundation Fostering education. Strengthening character.

(Schongau, May 2023) – Since 2007, the Frank Hirschvogel Foundation (FHF) has been committed to the advancement of science and education. Through selected programs such as scholarships and projects at schools, colleges, and universities, the organization supports talented young individuals. It provides students and university learners with opportunities to discover and explore new ideas.

Under the guiding principle “Building bridges. Shaping the future,” the FHF fosters knowledge exchange between young, aspiring talents and experienced mentors, and between education and industry.

The Foundation focuses its efforts on regions surrounding the corporate locations of the Hirschvogel Group. It supports young people and educational activities in and around Denklingen/Schongau, Eisenach, Gliwice (Poland), Ohio (USA), San Juan del Río (Mexico), Pune (India), and Pinghu (China).

As a forward-looking initiative, the Frank Hirschvogel Foundation was established by Dr. Manfred Hirschvogel († 2010) – then Managing Partner of Hirschvogel Holding GmbH – together with the family shareholders. It was founded as an independent, charitable public foundation under civil law, politically and religiously unaffiliated.

The Foundation is a shareholder of Hirschvogel Holding GmbH and holds a blocking minority. In this role, it advocates for the company’s economic independence as a family-owned enterprise and actively assumes social responsibility.

The Foundation is named in memory of Frank Hirschvogel, the son of Dr. Manfred and Anne Marie Hirschvogel, who tragically passed away in 2006 at the age of 18.
